PROFESSIONAL SUMMARY

Aspiring Frontend Developer with hands-on project experience using JavaScript, TypeScript, React.js, and Next.js. Skilled in building responsive user interfaces, interactive web applications, and authentication-based features. Passionate about developing user-friendly web experiences and continuously improving frontend development skills.

SELECTED PROJECTS

11. Bazar Dor — Market Price Platform Next.js · React.js · Better Auth
- Developed a web platform for displaying market prices of products.
- Implemented authentication using Better Auth.
- Restricted product details to authenticated users.
- Built a user interface for browsing market price information.

2. Fitness & Calorie Tracker React.js · Next.js · JavaScript
- Developed a fitness application to explore workout and calorie-related information.
- Implemented calorie-based sorting to help users compare options.
- Designed interactive cards to display fitness information.
- Created a responsive interface for a better user experience.

3. Show Booking Website HTML · CSS · JavaScript · TypeScript
- Built a show-booking website using HTML, CSS, JavaScript, and TypeScript.
- Developed the user interface for browsing shows and booking-related interactions.
- Applied responsive styling to improve usability across screen sizes.

TECHNICAL HIGHLIGHTS

- Component-Based UI Development
- Responsive Web Design
- Type-Safe Development with TypeScript
- Reusable Components
- Modern CSS and Tailwind Styling
- Mobile-First Design
